---

HTML, CSS, JS, React, Flutter, Java

## INTERNSHIP

---

- Talent Battle PVT.LTD Dec 2023-May 2024  
(Full stack developer intern)

The main goal of this internship was to learn by contributing to the development of a full-stack food delivery web application. In this Internship, my role as a web development intern was much interesting as of analysing the components & do some changes to modify its features, focusing on variety of elements of the project.

- INTERNSALA May 2023- July 2023  
(Flutter App Development)

This internship was to learn by contributing to the development of app application with flutter language. Developed real-time messaging and push notifications using Firebase, enhancing user engagement. Created responsive UI components for seamless performance across devices, improving user experience. Implemented secure user authentication and profile management with Firebase.

## PROJECTS

---

### Food order website May 2024

- Developed Interactive User Interface:** Designed and developed a responsive food delivery app interface using HTML, CSS, and React, providing a seamless experience across desktop and mobile devices with features like interactive menus, search functionality and registration and profile.
- Implemented modular components:** Developed reusable React components for menus, order forms, and user profiles, enhancing code maintainability and scalability.
